

USA FDA Registration Renewals

October 1 – December 31, 2026

February 2026

Any party who produces, processes, packages, or stores food (including alcoholic beverages) that will be consumed in the United States must register with the FDA. For imports, FDA registration is required for the importer of record and the foreign food facility (producer / winery).

Hillebrand Gori facilitates FDA food facility registration renewals, which are required every two years on even numbered years – the next renewal period will start on October 1st and end on December 31st, 2026.

Foreign producers will need to assign a US-nominated agent to complete the registration and renewal process. Hillebrand Gori can act as the US Agent for FDA registration and bi-annual registration renewals on behalf of foreign suppliers.

Process for 2026 Registration Renewals

- Renewal period starts October 1, 2026, and ends December 31, 2026
- If Hillebrand Gori is your nominated US Agent for FDA registration, we will reach out to the listed supplier contacts to assist in the renewal process.
- A valid, 9-digit facility identifier (DUNS number) must be used, and the contact information must exactly match the registration. To obtain a DUNS number, suppliers can contact [Dun & Bradstreet Support](#)
- Renewal period starts October 1, 2026, and the deadline is December 31, 2026
- For any new suppliers or questions, please contact fdausr@hillebrandgori.com
